Liquid Crystal Video Monitor / SDI Input Unit

BT-LS1400P/E
BT-YA210G

FOR BT-LS1400P

Specifications

[GENERAL]

Power supply:	AC 100 V to 240 V, 50-60 Hz
Power consumption:	0.98 A to 0.54 A

 indicates safety information.

Dimensions (W×H×D):

14 × 12-1/8 × 2-13/16 inch (main unit only)
(356 × 308.5 × 71.5 mm)
14 × 13-3/8 × 7-3/8 inch (with monitor stand)
(356 × 340 × 187 mm)

Weight:

10.5 lbs (4.6 kg) (main unit only)
12.4 lbs (5.6 kg) (with monitor stand)

Ambient operating temperature:

41 °F to 95 °F (5°C to 35°C)

Ambient operating humidity:

20% to 80% (no condensation)

Ambient temperature for storage:

-4 °F to 140 °F (-20°C to +60°C)

Ambient humidity for storage:

10% to 90% (no condensation)

[Panel]

Number of pixels:

921,600 (640 (H) × 480 (V), RGB)

Angle of view:

Top-bottom direction: 160°;
left-right direction: 160°

Screen dimensions (W×H):

288 × 217 (mm) (4:3 aspect)

[Video signal input]

LINE A:

NTSC composite (BNC)
1.0 Vp-p
S video signals (S connector prioritized)
Y: 1.0 Vp-p C: 0.268 Vp-p

LINE B:

NTSC composite (BNC)
1.0 Vp-p
S-video signals (S connector prioritized)
Y: 1.0 Vp-p C: 0.268 Vp-p

CMPNT:

Y: 1.0 Vp-p PbPr: 0.7 Vp-p
(BNC, 480/59.94i, 480/59.94P)

SDI (optional):

Component serial digital (BNC, 480/59.94i)

[Video signal output]

LINE A:

Loop-through output, 75 Ω automatic termination
(BNC, S connector)

LINE B:

Loop-through output, 75 Ω automatic termination
(BNC, S connector)

SDI (optional):

Buffer output (BNC, 480/59.94i)

[Audio input]

LINE A:

L/R input (RCA, phono pin), 0.5 Vrms

LINE B:

L/R input (RCA, phono pin), 0.5 Vrms

CMPNT:

L/R input (RCA, phono pin), 0.5 Vrms

SDI (optional):

Audio signals for CMPNT input

[Audio output]

LINE A:

Loop-through output, L/R (RCA, phono pin)

LINE B:

Loop-through output, L/R (RCA, phono pin)

Speakers:

Stereo (1 W + 1 W)

[Other]

REMOTE:

D-sub, 9 pin

[Accessories provided with the monitor]

Power cable × 1

Operating Instructions × 1

Cable clamp × 1

Screw for cable clamp × 1

OPTION(BT-YA210G)

Dimensions (W × H × D):

160 × 37 × 158 mm (6-5/16 × 1-7/16 × 6-1/4 inch)

Weight:

0.5 kg (1.1 lbs)

Input connector:

× 1 (with active through out configuration)

Formats supported:

480i (BT-LS1400P)

576i (BT-LS1400E/MC)

FOR BT-LS1400E

Specifications

SAFETY PRECAUTIONS

GENERAL GUIDELINES

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts, which have been over-heated or damaged by the short circuit.
2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
3. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

LEAKAGE CURRENT COLD CHECK

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohm meter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. The resistance value must be more than $5M\Omega$.

Figure1

LEAKAGE CURRENT HOT CHECK (See Figure 1)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a $1.5K\Omega$, 10W resistor, in parallel with a $0.15\mu F$ capacitor, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure1.
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet repeat each of the above measurements.
6. The potential at any point should not exceed 0.15 volts RMS. A leakage current tester (Simpson Model 229 equivalent) may be used to make the hot checks, leakage current must not exceed 0.1 milliamp. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

ABOUT LEAD FREE SOLDER (PbF)

Distinction of PbF PCB:

PCBs (manufactured) using lead free solder will have a PbF indication on the PCB.

Caution:

1. Pb free solder has a higher melting point than standard solder; Typically the melting point is $50-70^{\circ}F$ ($30-40^{\circ}C$) higher. Please use a high temperature soldering iron. In case of the soldering iron with temperature control, please set it to $700\pm 20^{\circ}F$ ($370\pm 10^{\circ}C$).
2. Pb free solder will tend to splash when heated too high (about $1100^{\circ}F/600^{\circ}C$).

ELECTROSTATICALLY SENSITIVE (ES) DEVICES

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any electrostatic charge on your body by touching a known earth ground.

Alternatively, obtain and wear a commercially available discharging wrist trap device, which should be removed for potential shock reasons prior to applying power to the unit under test.

2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device classified as "anti-static" can generate electrical charges sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it.
(most replacement ES devices are package with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.
CAUTION: Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.
8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity sufficient to damage an ES device).

X-RADIATION

WARNING

1. The potential source of X-radiation in EVF sets is the High Voltage section and the picture tube.
2. When using a picture tube test jig for service, ensure that jig is capable of handling 10kV without causing X-Radiation.

Note: It is important to use an accurate periodically calibrated high voltage meter.

3. Measure the High Voltage. The meter (electric type) reading should indicate $2.5kV$, $\pm 0.15kV$. If the meter indication is out of tolerance, immediate service and correction is required to prevent the possibility of premature component failure. To prevent an X-Radiation possibility, it is essential to use the specified picture tube.

- Use a rain cover when the unit is to be used outdoors in rainy weather.
- Only L-size DVCPRO cassette tapes can be used with this camera recorder.
Do not use standard size DV tapes or tapes of any other size.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK,
DO NOT REMOVE COVER (OR BACK).
NO USER SERVICEABLE PARTS INSIDE.
REFER TO SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (service) instructions in the literature accompanying the appliance.

WARNING:

TO REDUCE THE RISK OF FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS EQUIPMENT TO RAIN OR MOISTURE.

CAUTION:

TO REDUCE THE RISK OF FIRE OR SHOCK HAZARD AND ANNOYING INTERFERENCE, USE THE RECOMMENDED ACCESSORIES ONLY.

CAUTION:

TO REDUCE THE RISK OF FIRE OR SHOCK HAZARD, REFER CHANGE OF SWITCH SETTING INSIDE THE UNIT TO QUALIFIED SERVICE PERSONNEL.

FCC Note:

This device complies with Part 15 of the FCC Rules. To assure continued compliance follow the attached installation instructions and do not make any unauthorized modifications.

This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Replace battery with part No. CR2032 only.

Use of another battery may present a risk of fire or explosion.

Caution—Battery may explode if mistreated.

Do not recharge, disassemble or dispose of in fire.

ATTENTION:

The product you have purchased is powered by a nickel cadmium battery which is recyclable. At the end of its useful life, under various state and local laws, it is illegal to dispose of this battery into your municipal waste stream.

Please call 1-800-8-BATTERY for information on how to recycle this battery.

 indicates safety information.

Panasonic

SECTION 2

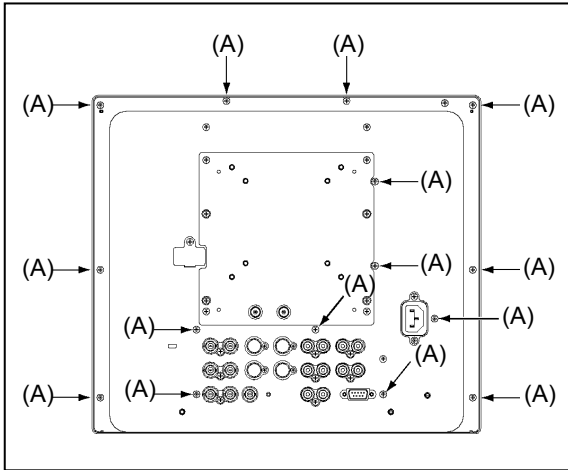

DISASSEMBLY

CONTENTS

2.1 Remove of the Back Case	DIS-1
2.2 Remove of the Jack Plate Unit	DIS-1
2.3 Remove of the Power Supply Unit	DIS-1
2.4 Remove of the SUB P.C.Board	DIS-1
2.5 Remove of the MAIN P.C Board	DIS-2
2.6 Remove of the LCD Unit	DIS-2

2 DISASSEMBLY

2.1 Remove of the Back Case

1. Thick cloth and so on is down not to damage a LCD screen, and the unit is pushed down.
2. Unscrew the 4 screws, and remove the stand unit.
3. Unscrew the 15 screws (A), and remove the back case.

2.2 Remove of the Jack Plate Unit

1. Remove the Back case.
2. Disconnect a connector (CN).
3. Unscrew the 3 screws (B), and remove the Jack Plate unit.

2.3 Remove of the Power Supply Unit

1. Remove the Back case.
2. Disconnect the 3 connectors (CN).
3. Unscrew the 2 screws (C), and remove the Power supply unit.

2.4 Remove of the SUB P.C.Board.

1. Remove the back case.
2. Disconnect the 3 connectors (CN).
3. Unscrew the 4 screws (D), and remove the SUB P.C.Board.

Note: In order to prevent any damage on the screw holes for the P.C.Board and power supply unit, tighten the screws with less than 0.3N-m (about 3kgf-cm) torque.

2.5 Remove of the MAIN P.C.Board

1. Remove the Back case.
2. Remove the Jack plate unit.
3. Remove the Power supply unit.
4. Disconnect the 7 connectors (CN).
5. Unscrew the 6 screws (E), and remove the MAIN P.C.Board.

Note: In order to prevent any damage on the screw holes for the P.C.Board and power supply unit, tighten the screws with less than 0.3N-m (about 3kgf-cm) torque.

2.6 Remove of the LCD Unit

1. Remove the back case.
2. Remove the jack plate unit.
3. Remove the power supply unit.
4. Remove the SUB P.C.Board.
5. Remove the MAIN P.C.Board.
6. Unscrew the 4 screws (F), and remove the LCD unit.

SECTION 3

ELECTRICAL ADJUSTMENT

CONTENTS

1.MAIN UNIT	ELE-1
1-1.FLICKER ADJUSTMENT	ELE-1
2.SD-SDI BOARD	ELE-1
2-1.YC TIMMING ADJUSTMENT	ELE-1
2-2.Y/C OUT Level Adjustment	ELE-2
TP and VR Location / Parts Location Table	ELE-3
MAIN P.C.BOARD (VEP18103A)	ELE-3
SUB P.C.BOARD (VEP18104A)	ELE-5
FRONT P.C.BOARD (VEP18105A)	ELE-6
JACK P.C.BOARD (VEP18106A)	ELE-6
SDI INPUT UNIT (BT-YA210G)	ELE-8

1. MAIN UNIT

1-1. FLICKER ADJUSTMENT

1. Be sure to warm up the unit for at least 30 minutes after turning it on.
2. In case of the BT-LS1400E, input a PAL signal to input terminal. (BT-LS1400P is no required input signal.)
3. While pressing [VOLUME v] button and press [MENU v] button simultaneously three times, so that the monitor displays the "ADJUST ITEM" screen as shown below.

4. Press the [SCAN] button to display the MAIN menu.
5. Press the [VOLUME v] button and select the "FLICKR" adjustment.

6. Adjust the Flicker Adjustment by the [MENU ^ v] button until the flicker on the screen is minimum.

Figure A

7. After adjustment, press the [VOLUME v] button and press [MENU/EXIT] button simultaneously to start the self-check function. And when the [MENU/EXIT] button is pressed, display returns to the normal screen.

NOTE

- 1) Adjust the flicker value at the optimum point and overrun once, and readjust it at the optimum point as shown in figure A.
- 2) Adjust the level of flicker at the optimum point because it doesn't disappear on the screen completely.

- 3). Do not change the value except the flicker adjustment by the MAIN menu.

2. SD-SDI BOARD

2-1. YC TIMMING ADJUSTMENT

BOARD	SD-SDI BOARD
TP	Y=TP4005,Pb=TP4006,Pr=TP4007
ADJ.	SW4001,SW4002
SIGNAL	2TPULSE
M.EQ	Oscilloscope
SPEC.	$A \leq 18.5\text{nS}$, $B \leq 37\text{nS}$

1. Install the SDI Input Unit on the Main Unit
2. Connect the oscilloscope to TP4005, TP4006 and TP4007 on the SDI Input Unit, and observes the waveform.
3. Change the combination of SW4001 and SW4002 as shown in the tables below so that the timing between the Y, Pb and Pr signals are within the specification.

Pb adjustment	
SW4001-1 ON	1STEP ADVANCE
SW4001-1,2 ON	2STEP ADVANCE
SW4001-3 ON	1STEP DELAY
SW4001-2,3 ON	2STEP DELAY

※1STEP=About 37nS movement

Pr adjustment	
SW4002-1 ON	1STEP ADVANCE
SW4002-1,2 ON	2STEP ADVANCE
SW4002-3 ON	1STEP DELAY
SW4002-2,3 ON	2STEP DELAY

※1STEP=About 37nS movement

2-2. Y/C OUT Level Adjustment

BOARD	SD-SDI BOARD
TP	Y=TP4005,Pb=TP4006,Pr=TP4007
ADJ.	Y=VR4143,Pb=VR4144,Pr=VR4145
SIGNAL	100% COLOR BAR SIGNAL
M.EQ	Oscilloscope
SPEC.	$V = 700 \pm 10\text{mV}$

1. Supply a 100% color bar signal to the Video Input.
2. Connect the oscilloscope to TP4005, and adjust VR4143 so that the Y level is within the specification.

3. Connect the oscilloscope to TP4005, and adjust VR4144 so that the Pb level is within the specification.

4. Connect the oscilloscope to TP4007, and adjust VR4145 so that the Pr level is within the specification.

EXPLODED VIEWS & REPLACEMENT PARTS LIST

Note:

1. *Be sure to make your orders of replacement parts according to this list.
2. Unless otherwise specified, all resistors are in OHMS, K=1,000 OHMS, all capacitors are in MICROFARADS (μ F), P= μ F.
3. The P.C. Board units marked with "■" shown below the main assembled parts.
4. The parts marked with Ⓔ on the exploded view show the electric parts.
5. IMPORTANT SAFETY NOTICE
Components identified with the mark Δ have the special characteristics for safety. When replacing any of these components, use only the same type.
6. The marking (RTL) indicates the retention time is limited for this item.
After the discontinuation of this assembly in production, it will no longer be available.

3. Maintenance	INF-3
3-1. Necessity for maintenance	INF-3
3-2. Maintenance Schedule.....	INF-3

1. Notes for part exchange

1-1. Exchange of the SUB print circuit board

When the New SUB print circuit board is replaced in the unit, automatically it will be in the warm up mode for 30 minutes after turning the power "ON".

Perform the electrical adjustment (flicker adjustment) after the completion of warm up.

<How to cancel warm up mode>

1. Press the [MENU/EXT] button to display the "MAIN MENU" on the screen.

MAIN MENU

2. Press [MENU v] or [MENU ^] button to move the cursor to the MAINTENANCE, and press the [ENTER] button so that display shows "RUNNING TIME".

MAINTENANCE

<In case of the BT-LS1400P>

3. While pressing the [VOLUME v] button and press the [BLUE] button simultaneously, so that the warm up mode is cancelled.

<In case of the BT-LS1400E>

3. While pressing the [VOLUME v] button and press the [ASPECT] button simultaneously, so that the warm up mode is cancelled.

1-2. Replace of the LCD Panel

When the LCD Panel is replaced, be sure to perform "flicker adjustment". (Refer to the Electrical Adjustment Section)

1-3. Replacement of Print Circuit Boards or/and Power supply unit.

When replacing the MAIN print circuit board, the SUB print circuit board or/and the Power supply unit to the LCD Panel, in order to prevent any damage on the screw holes, tighten the screws with less than **0.3N·m (about 3kgf·cm)** torque.

2. Self-check function

The phenomena like “ Stops Intermittently” or “No Picture/Sound Intermittently” which can not be confirmed at the time of servicing.

The trouble occurrence and narrow down of the defective circuit can be confirmed by using the self-check function.

2-1. How to access

1. While pressing [VOLUME v] button and press [MENU/EXIT] button simultaneously to start the self-check function.

SELF CHECK			
H21SOUND	OK		
F30AVSW	OK	H34GC2	OK
H35LTP	OK	H36PCON	OK
H90EEP	OK	H92EXIOA	OK

2-2. Display phenomenon and Processing circiut

Display symbol	Phenomenon/condition	Processing circiut
H21	No audio output.	MAIN C.B.A.
F30	No video and audio output. Input switching disabled.	MAIN C.B.A.
H34	Video trouble.	SUB C.B.A.
H35	No video output	SUB C.B.A.
H36	No video output	SUB C.B.A.
H90	Memory trouble	SUB C.B.A.
H92	Audio trouble	MAIN C.B.A.

* Any button operation or switching off the power will reset the self-chack data.

3. Maintenance

3-1. Necessity for maintenance

The BACKLIGHT power supply is used in this LCD monitor. This part (which is a consumable) will deteriorate over time and lead to a reduced level of performance and failure. For this reason, it involves periodic maintenance and servicing aimed at keeping up the performance that the monitor is designed to provide and preventing sudden failures caused by consumable part.

3-2. Maintenance Schedule

The times given below indicate rough times for maintenance. They do not indicate the operating life of the various parts. The times and part numbers are subject to change so consult the most recent maintenance guidelines.

No.	Part Name	Part No.	Quantity	Hours of exchange
1	LCD PANEL	L5EDD3L00003	1	55,000 hours

NOTE:

- Refer to the times displayed under each item under the “MAINTENANCE” in the SERVICE menus as a guide to replacement times.
- The BACKLIGHT can not be removed. Therefore, it exchange with the whole LCD PANEL.
